PROFESSIONAL SUMMARY

Flutter developer with hands-on experience since 2024 building cross-platform mobile and Wear OS applications with Clean Architecture and BLoC/Cubit. Integrates Django REST Framework backends and Firebase services (Authentication, Firestore, Cloud Messaging). Has built apps in education, mental health, and child support. Final-year student, open to remote and on-site Flutter roles.

TECHNICAL SKILLS

Mobile: Flutter, Dart, Responsive UI, Wear OS
State Management: BLoC, Cubit, GetX
Architecture: Clean Architecture (Data, Domain, Presentation), Repository Pattern, Dependency Injection (GetIt), JSON Serialization
Backend & APIs: Python, Django, Django REST Framework, RESTful API Integration
Firebase: Authentication, Cloud Firestore, Realtime Database, Cloud Functions, Cloud Messaging
Databases & Tools: PostgreSQL, SQLite, Git / GitHub, Postman

PROFESSIONAL EXPERIENCE

Freelance Flutter Developer Aug 2024 – Present

- Design and develop cross-platform mobile applications with Flutter and Dart, structured around Clean Architecture and the Repository Pattern.
- Manage state with BLoC and Cubit, keeping business logic separated from the UI.
- Integrate Django REST Framework backends: CRUD operations, error handling, and network-state management.
- Build Firebase-powered features: authentication, Firestore data sync, push notifications via Cloud Messaging, and live communication tools.

Flutter Course Instructor — Homs, Syria Sep 2024 – Nov 2024

- Taught a Flutter course for students covering UI implementation, state management, and REST API integration.

PROJECTS

Telmi — Connected Communication & Support Ecosystem Team project

Flutter | Wear OS | Firebase | WebRTC | Clean Architecture | BLoC/Cubit | GetIt

- Team project: a Parent app and a Child Wear OS smartwatch app supporting children with ASD and speech delays.
- Features include visual AAC communication, live location tracking, WebRTC video calls, and QR-based device pairing.

Tfouki — Educational & Examination Platform

Flutter | Django REST Framework | PostgreSQL | Cubit | Clean Architecture | Postman

- Built the Flutter app for schools: private video lessons, timed multiple-choice exams, and student progress tracking.
- Integrated REST APIs (CRUD), managed state with Cubit, mapped API responses to models, and tested endpoints with Postman.

Afiete — Mental Health & Specialist Platform

Flutter | Django REST Framework | PostgreSQL | Cubit | Clean Architecture | Pushy | Postman

- Built the Flutter app connecting users with psychological specialists: appointment booking, assessments, and digital records.
- Integrated REST APIs (GET/POST/PUT/DELETE), managed loading and error states with Cubit, and tested APIs with Postman.

EDUCATION

Bachelor of Informatics Engineering — Software Engineering 2021 – Expected 2027

Al-Baath University, Homs, Syria

COURSES & CERTIFICATES

- **Introduction to AI** — Google, via Coursera (2026)
- **Maximize Productivity With AI Tools** — Google, via Coursera (2026)
