**ALI HAMMADI**

Flutter Software Engineer | Mobile Application Architect

Homs, Syria | hamadea524@gmail.com | +963 937 472 856

www.aliehammade.me

**PROFESSIONAL SUMMARY**

Flutter Software Engineer specializing in building scalable, maintainable cross-platform mobile applications using Flutter and Dart. Strong expertise in Clean Architecture, BLoC/Cubit, Repository Pattern, Dependency Injection, RESTful APIs, Firebase, and real-time application development.

Experienced in integrating Flutter applications with Django and Django REST Framework, PostgreSQL, and Firebase services, with hands-on experience developing Wear OS applications and complex mobile ecosystems. Strong focus on software architecture, maintainable code, reliable application workflows, and scalable solutions.

**TECHNICAL SKILLS**

Mobile Development: Flutter, Dart, Cross-Platform Development, Responsive UI, Wear OS.

Architecture & State Management: Clean Architecture, BLoC, Cubit, GetX, Repository Pattern, Dependency Injection, GetIt.

Backend & APIs: Python, Django, Django REST Framework, RESTful APIs, CRUD Operations, JSON.

Databases & Cloud: PostgreSQL, SQLite, Firebase Authentication, Cloud Firestore, Firebase Realtime Database, Cloud Functions.

Real-Time & Communication: WebRTC, Firebase Cloud Messaging, Real-Time Data Synchronization, Live Tracking.

**PROFESSIONAL EXPERIENCE**

Freelance Flutter Software Engineer:

Aug 2024 – Present

Design and develop scalable cross-platform mobile applications using Flutter and Dart.

Apply Clean Architecture with clear separation between Data, Domain, and Presentation layers.

Design predictable and maintainable application state using BLoC and Cubit.

Implement Repository Pattern, Dependency Injection, and GetIt to improve modularity and maintainability.

Integrate Django and Django REST Framework backends, including CRUD operations, data models, API communication, error handling, and network states.

Implement Firebase Authentication, Cloud Firestore, Realtime Database, Cloud Functions, and Cloud Messaging.

Develop real-time communication and data synchronization features for mobile applications.

Freelance Flutter Instructor:

Homs, Syria

Mentor developers in Flutter architecture, UI development, and state management.

Teach REST API integration, application state handling, and practical mobile development workflows.

Guide developers through implementation and deployment of real-world Flutter features.

**SELECTED PROJECTS**

Telmi — Connected Communication & Support Ecosystem :

Developed a Flutter ecosystem consisting of a Parent Mobile Application and Child Wear OS Smartwatch Application.

Designed the application using Clean Architecture, BLoC/Cubit, GetIt, and Repository Pattern.

Built a connected solution supporting children with ASD and speech delays.

Tafouki — Educational & Examination Platform :

Developed a mobile educational platform for schools.

Implemented private video lessons, timed MCQ examinations, and student progress tracking.

Structured the application for maintainability and scalable feature development.

Afiete — Mental Health & Specialist Platform :

Developed a digital platform connecting users with psychological specialists.

Implemented workflows for appointments, assessments, digital records, and specialist interactions.

Focused on structured application architecture and reliable user workflows.

**EDUCATION**

Bachelor of Software Engineering :

Homs University — IT College

2021 – Present | Expected Graduation: 2027

**CORE ENGINEERING STRENGTHS**

Scalable Mobile Application Architecture

Clean Architecture & Separation of Concerns

Advanced State Management

Flutter & Dart Development

REST API & Backend Integration

Firebase & Real-Time Systems

Wear OS Application Development

Code Maintainability & Technical Problem Solving

Technical Mentoring
